

Coco Peat Discs / Coir Discs

100% Natural | Eco-Friendly | High Water Retention

Coco peat discs, also known as coir discs or peat coins, are eco-friendly growing media made from compressed coconut coir fibers. These discs expand when water is added, creating the perfect environment for seed germination and healthy plant growth. Ideal for nurseries, home gardening, and commercial cultivation, coco peat discs are a sustainable alternative to traditional soil.

APPLICATIONS

- Seed starting and germination
- Nursery and greenhouse cultivation
- Vegetable, flower, and herb gardening
- Hydroponics and soilless cultivation
- Perfect for small pots, trays, and propagation

USERS

- Home Gardeners
- Nurseries & Greenhouses
- Farmers & Growers
- Landscapers
- Urban Gardening Enthusiasts

PRODUCT HIGHLIGHTS

- 100% Organic & Natural
- Low EC for safe plant growth
- Excellent water retention
- Promotes healthy root development
- Biodegradable and environmentally friendly
- Customizable sizes as per customer requirement

AVAILABLE SIZES

We offer a wide range of sizes to suit different plants and growing needs. Custom sizes and EC levels (Low EC / As per customer requirement) are available on request.
